

Book Your Salvadori Summer Program Now

The Salvadori Center shows students the relevance of math and science using the buildings, bridges, landmarks, and parks in their local communities.

Through collaborative, hands-on, project-based learning, and a scientific method of discovery, students see the math and science within the classrooms they enter, the bridges they cross, the parks they play in, and the buildings they see every day.

Collaborative, project-based STEAM programs

PROGRAMS START:

- Tuesday, 11 July 2017
